

### DESCRIPTION

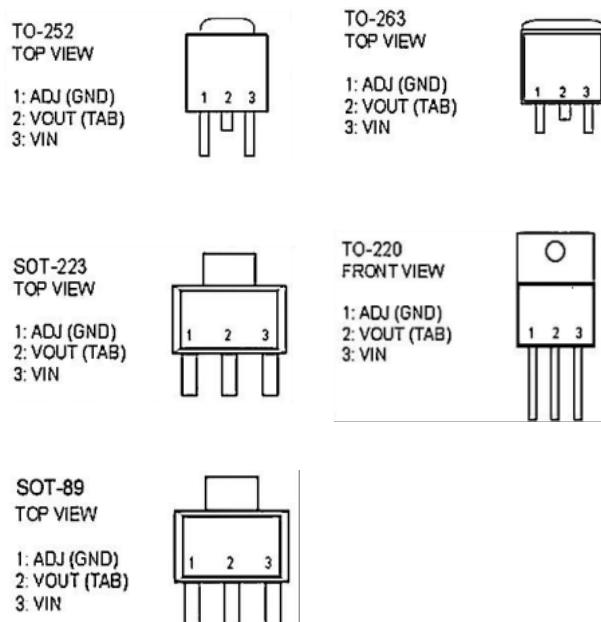

The AMS1117 is a three-terminal output current up to 1A Output low pressure difference linear regulator, 1.2V, 1.8V, 2.5V, 3.3V, 5.0V and adjustable output voltage and other versions, Its voltage drop is only 1.2V at 1A. With its excellent nature Energy and extreme economic performance, suitable for all kinds of electrical production Product.

### FEATURES:

- The voltage drop of 1A output current is 1.2V
- Current limiting function
- Overheat protection
- Fixed output voltage 1.2V, 1.8V, 2.5V, 3.3V, 5.0V and adjustable output voltage version
- The voltage accuracy is 2% with a fixed output voltage of 1.2V
- Fixed output voltage 1.8V, 2.5V, 3.3V, 5.0V
- And adjustable output voltage accuracy is 1.5%
- Temperature range: -40 ° C to +125 ° C

### APPLICATION :

- Palm pilots and laptops
- Battery chargers
- SCSI- ii Active terminal
- mobile telephone
- Battery supply system
- Switching power supply rear voltage regulator

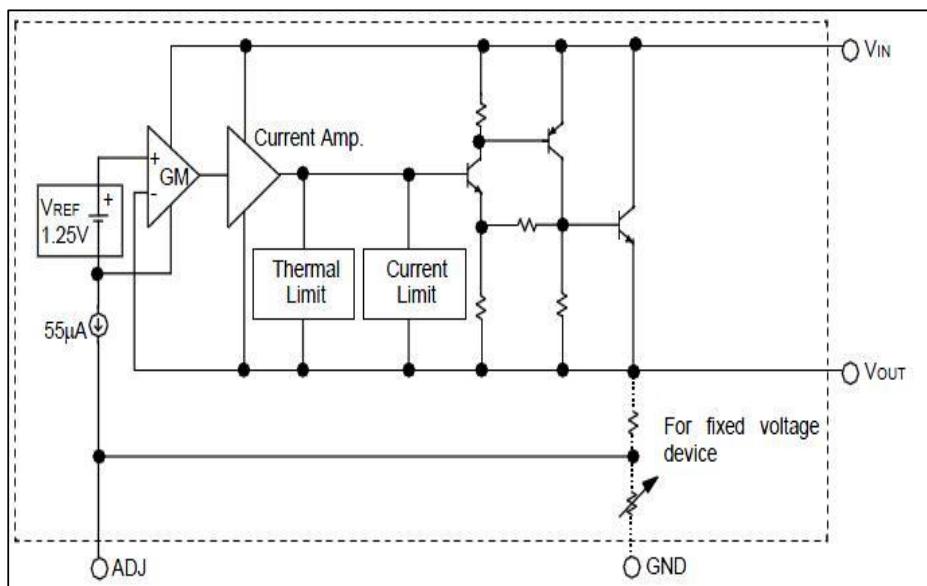

### Absolute Maximum ratings

Parameter	Symbol	Value	Unit
Input Voltage	Vin	18	V
Pin temperature (welding 5 seconds)	Tlead	260	°C
Working junction temperature range	Tj	150	°C
ESD capability (minimum)	ESD	2000	V
Power Dissipation	PD	Note1	mW
Operating Junction Temperature Range	TOPR	-40~+125	°C
Storage Temperature Range	TSTG	-65~+150	°C

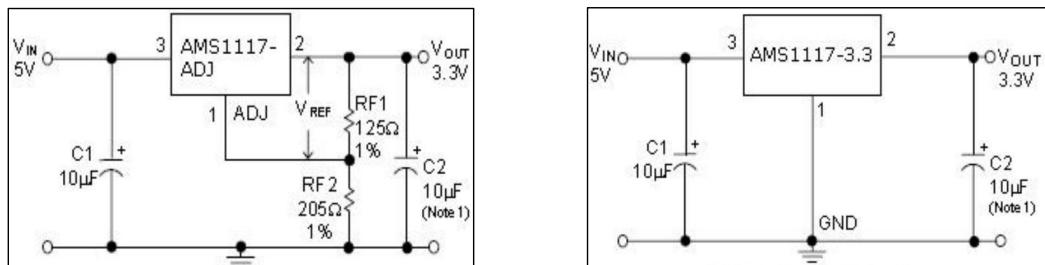

**Note1:** Maximum permissible power consumption is a function of the maximum operating junction temperature Tj(Max), pair air thermal resistance and ambient temperature. Maximum permissible power consumption At a given ambient temperature, exceeding the maximum allowable power consumption will cause the chip temperature to be too high, and the regulator will therefore enter overheat protection State. The pair air thermal resistance of different packaging types is different, depending on the packaging technology.

# AMS1117 Series

The internal block diagram :

## Typical application circuit

$$V_{ref}=V_{out}-V_{adj}=1.25V \text{ (typical value)}$$

$$V_{out}=V_{ref} \times (1+RF_2/RF_1)+I_{adj} \times RF_2$$

$$I_{adj}=55\mu A \text{ (typical value)}$$

## Recommended working conditions :

Parameter	Symbol	Value	Unit
Input Voltage	V <sub>in</sub>	12	V
Working junction temperature range	T <sub>j</sub>	-40~+125	°C
