TPD1E04U04 1-Channel ESD Protection Diode with Low R_{DYN} for HDMI 2.0 and USB 3.0

1 Features

- IEC 61000-4-2 Level 4 ESD Protection
  - ±16-kV Contact Discharge
  - ±16-kV Air Gap Discharge
- IEC 61000-4-4 EFT Protection
  - 80 A (5/50 ns)
- IEC 61000-4-5 Surge Protection
  - 2.5 A (8/20 µs)
- IO Capacitance: 0.5-pF (Typ), 0.65-pF (Max)
- Ultra-low ESD Clamping Voltage
  - 8.9 V at 16-A TLP
  - –4.6 V at –16-A TLP
- Low R_{DYN}
  - 0.25 Ω IO to GND
  - 0.18 Ω GND to IO
- DC Breakdown Voltage: 5 V (Minimum)
- Ultra-low Leakage Current: 10 nA (Maximum)
- Supports High Speed Interfaces up to 6 Gbps
- Industrial Temperature Range: –40°C to +125°C
- Industry Standard 0402 and 0201 Packages

2 Applications

- End Equipment
  - Set-Top Boxes
  - Laptops and Desktops
  - TV and Monitors
  - Mobile and Tablets
  - DVR and NVR
- Interfaces
  - HDMI 2.0
  - HDMI 1.4b
  - USB 3.0
  - DisplayPort 1.2
  - PCI Express 3.0

3 Description

The TPD1E04U04 is a unidirectional TVS ESD protection diode for HDMI 2.0 and USB 3.0 circuit protection. The TPD1E04U04 is rated to dissipate ESD strikes above the maximum level specified in the IEC 61000-4-2 international standard (Level 4).

This device features a 0.5-pF IO capacitance making it ideal for protecting high-speed interfaces up to 6 Gbps such as HDMI 2.0 and USB 3.0. The low dynamic resistance and ultra-low clamping voltage ensure system level protection against transient events for sensitive SoCs.

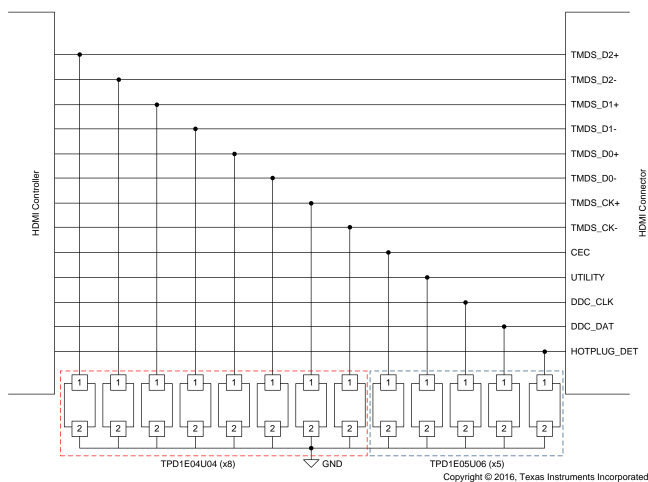
The TPD1E04U04 is offered in the industry standard 0402 (DPY) and 0201 (DPL) packages.

Device Information(1)

PART NUMBER	PACKAGE	BODY SIZE (NOM)
TPD1E04U04	X1SON (2)	0.60 mm × 1.00 mm
TPD1E04U04	X2SON (2)	0.60 mm × 0.30 mm

(1) For all available packages, see the orderable addendum at the end of the data sheet.

Typical HDMI 2.0 Application



An IMPORTANT NOTICE at the end of this data sheet addresses availability, warranty, changes, use in safety-critical applications, intellectual property matters and other important disclaimers. PRODUCTION DATA.

Pin Functions

PIN		TYPE	DESCRIPTION
NO.	NAME		
1	IO	I/O	ESD Protected Channel
2	GND	Ground	Ground. Connect to ground

6 Specifications

6.1 Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted)[1]

		MIN	MAX	UNIT
Electrical fast transient	IEC 61000-4-4 (5/50 ns)		80	A
Peak pulse	IEC 61000-4-5 power (t_p - 8/20 µs) - DPY Package		19	W
	IEC 61000-4-5 power (t_p - 8/20 µs) - DPL Package		16	W
	IEC 61000-4-5 current (t_p - 8/20 µs)		2.5	A
T_A	Operating free-air temperature	–40	125	°C
T_{stg}	Storage temperature	–65	155	°C

(1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, which do not imply functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions*. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

6.2 ESD Ratings

			VALUE	UNIT
$V_{(ESD)}$	Electrostatic discharge	Human-body model (HBM), per ANSI/ESDA/JEDEC JS-001[1]	±2500	V
		Charged-device model (CDM), per JEDEC specification JESD22-C101[2]	±1000	

(1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
(2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

6.3 ESD Ratings—IEC Specification

			VALUE	UNIT
$V_{(ESD)}$	Electrostatic discharge	IEC 61000-4-2 contact discharge	±16000	V
		IEC 61000-4-2 air-gap discharge	±16000	

6.4 Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V_{IO}	Input pin voltage	0	3.6	V
T_A	Operating free-air temperature	–40	125	°C

6.5 Thermal Information

THERMAL METRIC[1]		TPD1E04U04 DPY (X1SON) 2 PINS	TPD1E04U04 DPL (X2SON) 2 PINS	UNIT
$R_{\theta JA}$	Junction-to-ambient thermal resistance	683.6	574	°C/W
$R_{\theta JC(top)}$	Junction-to-case (top) thermal resistance	494.2	332.2	°C/W
$R_{\theta JB}$	Junction-to-board thermal resistance	568.7	237.6	°C/W
ψ_{JT}	Junction-to-top characterization parameter	217.4	150.2	°C/W
ψ_{JB}	Junction-to-board characterization parameter	568.7	238.2	°C/W
$R_{\theta JC(bot)}$	Junction-to-case (bottom) thermal resistance	N/A	N/A	°C/W

(1) For more information about traditional and new thermal metrics, see the *Semiconductor and IC Package Thermal Metrics* application report.

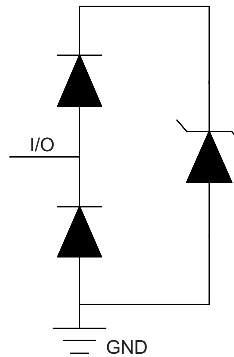
7 Detailed Description

7.1 Overview

The TPD1E04U04 is a unidirectional ESD Protection Diode with ultra-low capacitance designed for HDMI 2.0 and USB 3.0. This device can dissipate ESD strikes above the maximum level specified by the IEC 61000-4-2 International Standard. The extremely low clamping voltage and low R_{DYN} make this device ideal for supporting the next-generation small feature size SoCs. The low capacitance also makes this device ideal for protecting any high-speed signal pins on these sensitive interface pins.

7.2 Functional Block Diagram



7.3 Feature Description

7.3.1 IEC 61000-4-2 ESD Protection

The IO pins can withstand ESD events up to ±16-kV contact and ±16-kV air gap. An ESD-surge clamp diverts the current to ground.

7.3.2 IEC 61000-4-4 EFT Protection

The IO pins can withstand an electrical fast transient burst of up to 80 A (5/50 ns waveform, 4 kV with 50-Ω impedance). An ESD-surge clamp diverts the current to ground.

7.3.3 IEC 61000-4-5 Surge Protection

The IO pins can withstand surge events up to 2.5 A and 19 W (8/20 µs waveform). An ESD-surge clamp diverts this current to ground.

7.3.4 IO Capacitance

The capacitance between each IO pin to ground is 0.5-pF (typical) and 0.65-pF (maximum). This device supports data rates up to 6 Gbps.

7.3.5 Ultra-Low ESD Clamping Voltage

The IO pins feature an ESD clamp that is capable of clamping the voltage to 8.9 V (I_{TLP} = 16 A) and –4.6 V (I_{TLP} = –16 A).

7.3.6 Low R_{DYN}

The IO pins feature an ESD clamp that has an extremely low R_{DYN} of 0.25 Ω (IO to GND) and 0.18 Ω (GND to IO) which prevents system damage during ESD events.

7.3.7 DC Breakdown Voltage

The DC breakdown voltage of each IO pin is a minimum of 5 V. This ensures that sensitive equipment is protected from surges above the reverse standoff voltage of 3.6 V.

Copyright © 2016, Texas Instruments Incorporated

Feature Description (continued)

7.3.8 Ultra Low Leakage Current

The IO pins feature an ultra-low leakage current of 10 nA (maximum) with a bias of 2.5 V.

7.3.9 Supports High Speed Interfaces

This device is capable of supporting high speed interfaces up to 6 Gbps, because of the very low IO capacitance.

7.3.10 Industrial Temperature Range

This device features an industrial operating range of –40°C to +125°C.

7.3.11 Easy Flow-Through Routing Package

The layout of this device makes it simple and easy to add protection to an existing layout. The packages offers flow-through routing, requiring minimal modification to an existing layout.

7.4 Device Functional Modes

The TPD1E04U04 is a passive integrated circuit that triggers when voltages are above V_{BR} or below V_F. During ESD events, voltages as high as ±16-kV (air) can be directed to ground via the internal diode network. When the voltages on the protected line fall below the trigger levels of TPD1E04U04 (usually within 10s of nano-seconds) the device reverts to passive.

8 Application and Implementation

NOTE

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

8.1 Application Information

The TPD1E04U04 is a diode type TVS which is used to provide a path to ground for dissipating ESD events on high-speed signal lines between a human interface connector and a system. As the current from ESD passes through the TVS, only a small voltage drop is present across the diode. This is the voltage presented to the protected IC. The low R_{DYN} of the triggered TVS holds this voltage, V_{CLAMP}, to a safe level for the protected IC.

8.2 Typical Application

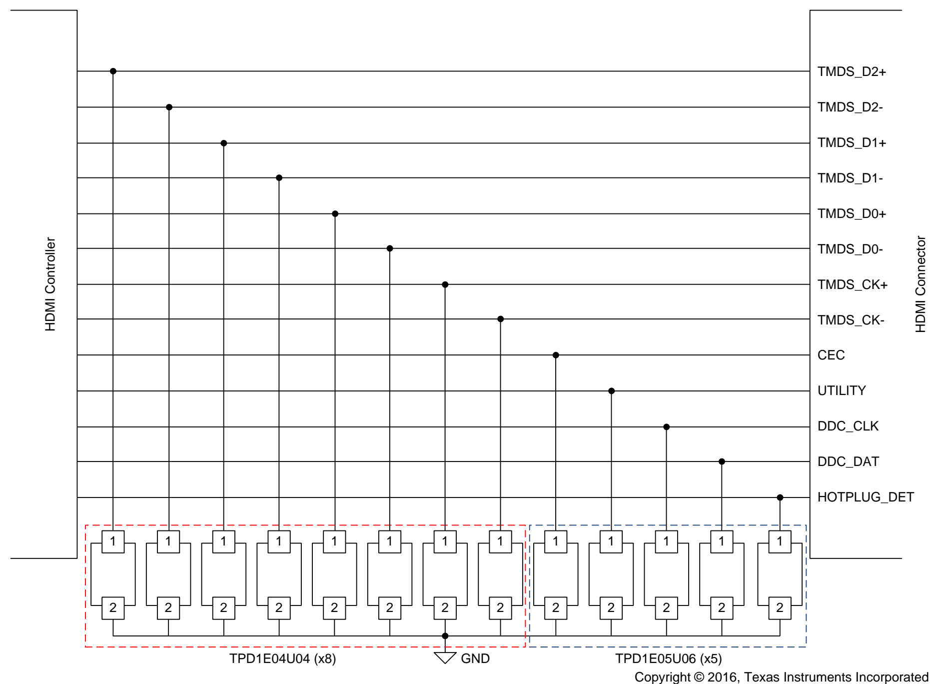

Figure 13. HDMI 2.0 ESD Schematic

8.2.1 Design Requirements

For this design example eight TPD1E04U04 devices and five TPD1E05U06 devices are being used in a HDMI 2.0 application. This provides a complete ESD protection scheme.

Given the HDMI 2.0 application, the parameters listed in Table 1 are known.

Table 1. Design Parameters

DESIGN PARAMETER	VALUE
Signal range on TMDS lines	0 V to 3.6 V
Operating frequency on TMDS lines	up to 3 GHz
Signal range on control lines	0 V to 5.5 V

Copyright © 2016, Texas Instruments Incorporated

8.2.2 Detailed Design Procedure

8.2.2.1 Signal Range

The TPD1E04U04 supports signal ranges between 0 V and 3.6 V, which supports the TMDS pairs on the HDMI 2.0 application. The TPD1E05U06 supports signal ranges between 0 V and 5.5 V, which supports the control lines.

8.2.2.2 Operating Frequency

The TPD1E04U04 has a 0.5-pF (typical) capacitance, which supports the HDMI 2.0 data rates of 6-Gbps. The TPD1E05U06 has a 0.5-pF (typical) capacitance as well, which easily supports the control line data rates.

8.2.3 Application Curves

9 Power Supply Recommendations

This device is a passive ESD device so there is no need to power it. Take care not to violate the recommended IO specification (0 V to 3.6 V) to ensure the device functions properly.

10 Layout

10.1 Layout Guidelines

- The optimum placement is as close to the connector as possible.
  - EMI during an ESD event can couple from the trace being struck to other nearby unprotected traces, resulting in early system failures.
  - The PCB designer must minimize the possibility of EMI coupling by keeping any unprotected traces away from the protected traces which are between the TVS and the connector.
- Route the protected traces as straight as possible.
- Eliminate any sharp corners on the protected traces between the TVS and the connector by using rounded corners with the largest radii possible.
  - Electric fields tend to build up on corners, increasing EMI coupling.

11.2 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. In the upper right corner, click on *Alert me* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

11.3 Community Resources

The following links connect to TI community resources. Linked contents are provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's Terms of Use.

TI E2E™ Online Community ***TI's Engineer-to-Engineer (E2E) Community.*** Created to foster collaboration among engineers. At e2e.ti.com, you can ask questions, share knowledge, explore ideas and help solve problems with fellow engineers.

Design Support ***TI's Design Support*** Quickly find helpful E2E forums along with design support tools and contact information for technical support.

11.4 Trademarks

E2E is a trademark of Texas Instruments.
All other trademarks are the property of their respective owners.

11.5 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

11.6 Glossary

SLYZ022 — *TI Glossary*.

This glossary lists and explains terms, acronyms, and definitions.

12 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
TPD1E04U04DPLR	ACTIVE	X2SON	DPL	2	15000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 125	K	Samples

TPD1E04U04DPYR	ACTIVE	X1SON	DPY	2	10000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 125	3K	Samples
TPD1E04U04DPYT	ACTIVE	X1SON	DPY	2	250	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 125	3K	Samples

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATASHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES “AS IS” AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, or other requirements. These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI’s products are provided subject to TI’s Terms of Sale (www.ti.com/legal/termsofsale.html) or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI’s provision of these resources does not expand or otherwise alter TI’s applicable warranties or warranty disclaimers for TI products.
